landproDATA

IRRIGATION DISTRICTS

Digitalize your existing data into our cloud GIS system to show ditches, service boxes, culverts, underground pipes, and more.

AMAZING FEATURES

SHAREHOLDERS

Securely manage shareholder information from any web-connected device.

CUSTOMIZED DATA

Upload your data to landproDATA to create unique company layer sections on the map.

INFRASTRUCTURE

Draw polygons, lines, and points that document irrigation infrastructure for district members.

AUDIT TOOLS

Our audit tools keep you apprised of owner, parcel, and subdivision changes, with tools to adjust account data accordingly.

NEWS

Private and public newsfeeds highlight articles, action items, and current events in areas of interest in your district.

WHY CHOOSE US?

- GIS software manages water shares and canal infrastructure in the map database.
- Combine shareholder data with updated Parcel Information.
- Advantages over traditional non-GIS data methods to better analyze your market.
- Merge your data from landproDATA to Quickbooks for accounting and invoicing.
- Create updated customer lists for billing.

ABOUT US

Developed by a land professional for land professionals, **landproDATA** provides a data-driven mapping tool that gives Engineers and Planners the comprehensive, accurate GIS data, visuals, and reports you need. Our web-based solution allows you to gather information quicker, keep your customers happy, and not miss the latest news for team projects. Anytime. Anywhere.
